ANIRUDH SETHI

Senior Automation Developer, Toronto, Canada

ani10030@gmail.com | +1-(437)-979-1849 | www.linkedin.com/in/anirudh-sethi | www.anirudhsethi.in

Status in Canada: Permanent Resident   *Certified Advanced RPA Developer, UiPath*

WORK EXPERIENCE

8 Years of experience in driving strategic digital transformations with intelligent automation, data analytics, and solution designs.

Adobe, Senior Automation Developer, *Toronto, Canada*   03/2020 - Present
- Led the **end-to-end solution architecture** for transformation from manual audits to automated audits delivering automations for **125+ use cases** in Adobe's Finance & Internal Audit vertical, **reducing ~90% manual effort**.
- Spearheaded partnerships with multiple technology teams and business stakeholders for identification, technical design, and implementation of high-impact automation opportunities, **increasing technology adoption by 50%.**
- Strategized technical roadmap of Robotic Process Automation (RPA) Enabled NextGen Auditing and established a **Continuous Risk Monitoring Platform**. *Read the article published on Adobe Tech Blog.*
- Designed & developed **50+ high-performance & scalable automation solutions** from ideation to production using technologies like RPA (UiPath), Power Automate, Python, SQL, API Integrations, SAP, PowerBI, PowerApps, etc.
- Collaborated closely with cross-functional and technical teams to develop **transformation strategies and re-engineered business processes** for technical efficiencies through **automation** and **application integrations**.
- Owned the Automation platform and implemented reusable components **reducing re-work & turn-around times**. Enforced SDLC best practices for efficiency resulting in **reduced license costs** and maximized efficiency & productivity.
- Engineered a self-serve **Automation Portal** and implemented Proof-of-Concept for multiple AI use cases.

GoodLives, Technology Lead, Remote, India (*https://www.goodlives.in)*   07/2020 – 08/2022
- Led the design & development of a scalable web application serving **20,000+ customers** with **100+ daily bookings**.
- Led the architecture design and development of a **Slack application**, expanding product portfolio and customer offerings for GoodLives, resulting in a **25% increase in customer engagement**.
- Managed, analyzed, and optimized cloud infrastructure to meet business requirements with minimal cost impacts.
- Automated cloud infrastructure with implementation of **DevOps**, **CI/CD**, and custom scripts streamlining deployments and infrastructure maintenance.

Infosys Limited, Technology Analyst, *Chandigarh, India*   05/2016 – 03/2020
- Designed and developed 12+ RPA use cases with UiPath through Agile implementation.
- **Mentored 4 junior developers** in UiPath RPA and established RPA coding standards and reusable components for clients.
- Developed multiple ETL processes translating complex business requirements into high-quality PL/SQL code using **Oracle Database, Python, and Unix scripts**.

PROJECT EXPERIENCE

- **Change Management Automation**
  - Re-engineered existing manual process to a fully automated solution loading and validating data from 5 sources.
  - Reduction of Manual Effort from **20 business days to 1 day.**

- **Archer Dashboard Refresh Automation**
  - Innovated a solution to integrate a web application (Archer) with Power BI dashboards by using RPA Bots as data carriers instead of paid APIs, allowing the team to **save USD 5,000 every year** in API subscription renewal costs.
- **Quarterly Access Reviews Automation**
  - Quarterly audit of 2500+ employees' access to multiple financial systems with automated data collection and validations.
  - Reduction of manual effort from **5 business days to 0.5 days.**

EDUCATION

- **Punjabi University**, *Bachelor's in Technology (Electronics & Communication), Patiala, India*   08/2012 – 05/2016
- **Certification in Advance RPA Development**

SKILLS

Robotic Process Automation	UiPath	Python	Power Automate	Google Cloud, AWS
Business Process Automation	API Integrations	SQL, PL/SQL	Power Apps	Web Development
Process Mining	SAP	Scripting	Power BI	Oracle DB, MySQL DB
Process Re-engineering	Jenkins CI/CD	GitHub	AI ML Integrations	MongoDB
